SMIT WANDRE

891 Birch Rd, East Lansing 48825, Student/Junior | wandresmit@gmail.com | (517) 455-3615 | Seeking SWE/SDE Jobs

EDUCATION

Michigan State University, College of Engineering, Honors College   East Lansing, Michigan
Bachelor of Science, Computer Science, GPA 4.00   August 2023 - December 2026
Dean's List

SKILLS

Python | Ruby | HTML | CSS | JavaScript | React.js | Flask | Figma | Dafny | OpenCV | Object Detection | Machine Learning C | C++ | Git | Streamlit

EXPERIENCE

KNEO Automation   Pune, Maharashtra
Machine Learning Intern   May 2024 - August 2024
- Developed an object detection pipeline using Ultralytics YOLOv8 and OpenCV to extract dimensions, angles, and other measurements from industrial blueprints, automating a manual process
- Processed and structured extracted data into Excel sheets, improving data accessibility and analysis for industrial applications and applied machine learning techniques to enhance accuracy and efficiency in blueprint measurement extraction, demonstrating expertise in computer vision and automation

Department of Computer Science, Michigan State University   East Lansing, Michigan
Undergraduate Teaching Assistant   August 2024 - Present
- Guided two sections of 30 students each, supplying thorough support with course materials during class to promote a strong understanding of critical Python concepts
- Provided online help through the Piazza platform and enhanced student engagement for more than 1200 students

Research in Sustainable Investing, Michigan State University   East Lansing, Michigan
Undergraduate Research Seminar   August 2024 - Present
- Participated in a year-long seminar investigating the impact of sustainability on financial markets in the US, Japan, and Europe. Conducted cross-cultural research in collaboration with Setsunan University (Japan) and the Norwegian School of Economics (Norway) to compare sustainable finance practices
- Managed a simulated $1M stock portfolio, focusing on the influence of sustainability on stock value and investment risk

PROJECTS

Personal Project
- Developed a complete ML pipeline using Python for predicting crop yields based on environmental data (temperature, rainfall, soil quality).
- Built and evaluated a linear regression model, and deployed an interactive Flask frontend integrated with Plotly visualizations. Demonstrated skills in data preprocessing, model training, evaluation, and full-stack application development.

Stock Analysis Dashboard
Personal Project
- Built an interactive web app using Streamlit to analyze stock market trends with real-time data from Yahoo Finance API
- Integrated financial indicators (e.g., Moving Averages, RSI, MACD, Bollinger Bands) and visualized insights with Matplotlib and automated metrics including profit/loss percentage and average daily change, enabling customizable user inputs for dynamic analysis
